

Origami Boats

Origami is the Japanese art of paper folding.

To make your own origami boat (or Flotilla!) look at the accompanying instructional diagram and watch the video created for this activity. The steps are titled in the film allowing you to pause and catch up.

You might find you need to make a couple of boats to get a finish you are happy with. Be as neat and accurate as you can and make confident creases as you go.

For boat decoration ideas why not check out the Museums and Schools '**Dazzle Camouflage**' activity and apply some striking artwork.
